

Ultima 2.0
Cooperative OS
Simulator

Scheduler/Semaphore
Phase 1

Implements task
management and
synchronization using a
round-robin scheduler
and semaphores to
control access to shared
resource

Message Passing
Phase 2

Implements inter-process
communication through
task mailboxes and
message queues, allowing
tasks to send and receive
structured messages for
safe communication and
coordination during
execution

Memory Management
Phase 3

File Systems
Phase 4
